- ROBOTIC WELDING
- WATERJET CUTTING

“QUALITY ON TIME”

PRECISION WATERJET CUTTING

With our abrasive waterjet we can provide complex cutting of virtually any material such as hardened tool steel, aluminum and titanium; exotics including carbon fibre, ceramic, Inconel® and composites; or architectural materials such as marble, granite, glass, tile and stone. Tolerance and accuracy is within $\pm .003$ " and waterjet cutting leaves no burrs or Heat Affected Zone (HAZ). The Omax 55100 Waterjet Machine allows the cutting/machining of shapes and materials with minimal setup time. Please provide us your .DXF files, CAD files or scanned images for a free quotation.
